The Jellybean Tunes App Report

by MOMS WITH APPS on OCTOBER 25, 2011

Welcome to the second installment of the App Report showcasing family-friendly apps from our Moms With Apps members. After last week's bonanza, we have a smaller, but no less exciting selection of apps for you this week.

Moms With Apps is a collaborative group of family-friendly developers seeking to promote quality apps for kids and families. Our app catalog is now available on iTunes.

ASSISTIVE TECHNOLOGY (THE SIMON TECHNOLOGY CENTER)

The [Simon Technology Center](#) helps children and adults with disabilities and their families use assistive technology to improve their lives. The Simon Technology center believes that technology allows children and adults with disabilities to keep pace with a rapidly changing world by providing opportunities for communication, education, recreation, employment, and independence.

The Simon Technology Center offers information and resources on assistive technology through:

- individualized technology consultations for children or adults with disabilities
- workshops on assistive technology and related issues for parents and professionals
- a statewide technology and software lending library
- a computer laboratory that members of the community may use
- a training model for early childhood professionals and parents of young children with disabilities, ages 3-8
