

## The Orange Frog: Sparking a Culture of Positivity, Happiness and Success

Based on the research of Harvard University's best-selling author Shawn Achor

Workshop participants first learn to embrace the benefits of positive performance they then share them naturally with co-workers leading to a compounding effect inside the organization. This workshop teaches the science of sustainable peak performance. The research is clear. Positive environments are performance enhancers. They are characterized by higher productivity, less turnover and more resilient cultures.

Applying the latest research-based techniques from the field of positive psychology, individuals learn the practices of resilient leaders; they become more adaptable and develop a capacity to "see" more opportunities, leading to better results.
